

Lesson 2: Short Vowel Words

When your student has learned the “A-a-Adam Song” by heart and can point to a phonetic picture and say the sound of the letter, he or she is ready for this lesson! In this lesson, your student will first use the phonetic pictures to sound out short vowel words. Then he or she will transition to reading the word in uppercase and lowercase.

Directions: Have the student sound out each word using the phonetic pictures. Then have him read the uppercase version of the word. Finally, have him read the lowercase version of the word. Ask the student if he knows what the word means and explain any words he is unfamiliar with. There are 222 words, so it will probably take your student several sessions to read the entire list. If you have the Funny Phonics flashcards, you can have the student build these words using the flashcards. You may also want to get magnetic letters that can be used on a refrigerator or metal cookie sheet. Other ideas include rolling out the letters with Play-Doh or using white board markers on a window, glass door, or mirror. Make reading fun!
